

Maritime & Offshore Services

ASBESTOS & HAZMATS

Kiwa Oesterbaai Maritime & Offshore conducts asbestos & HazMat surveys, monitoring programs, risk evaluations and advice on all types of vessels, offshore platforms and structures all over the world.

Accredited Surveys, Consultancy & Preferred Supplier

Within the field of dangerous materials and substances Kiwa Oesterbaai Maritime & Offshore provide certified or accredited surveys, monitoring programs, risk evaluations and advice. All industrial objects, ships and offshore platforms are required to have an asbestos risk assessment. When risks are present owners/tenants need to be in possession of an asbestos risk management plan with implemented steps and procedures to reduce or even remove these risks. This plan has to be reviewed and evaluated over time. Our surveyors are fully certified to conduct their surveys on and offshore, during (dry) docking or in operation offshore.

Kiwa Oesterbaai Maritime & Offshore are certified by Rina and DNV-GL. In addition we are proud to say that we are a preferred supplier for Bureau Veritas and Lloyds Register.

Local Presence & Fast Response Times

Our headoffices are situated in Rotterdam but we are backed by an employability at national and international level. Thanks to this vast network of trained surveyors we can assure fast response times wherever you are situated, minimizing your downtime!

GLOBAL MARITIME SERVICES

- Supervision or project management during removal & remedial works
- Incident response team with fully equipped emergency vessels
- Fast response times thanks to global presence

Please do not hesitate to contact us for any further information. We would be glad to assist!

HAZMAT MANAGEMENT

In compliance with the latest IMO guidelines

The International Maritime Organisation (IMO) and separately the EU have issued guidelines for the process of recycling ships and their waste materials. These guidelines will be imposed for all EU flagged ships as from December 2018 (new builds) and 2020 (existing vessels). Kiwa Oesterbaai's HazMat experts can assist you with the IHM in accordance to the latest standards. We work together with our clients to minimize downtime, either during port calls or when in dry-dock for repairs or maintenance.

IHM assistance

The presence of HazMats and substances in industrial objects, ships or offshore platforms can pose a threat to human health and the environment. The Hong Kong Convention & EU Ship Recycling Regulation state that in the very near future all potential hazardous materials should be inventoried and catalogued throughout the entire lifecycle. We take care of your needs and guarantee to deliver on the most complex of projects ensuring that vessels are completed on time and to client satisfaction.

DID YOU KNOW

- Our surveyors are fully certified to conduct their surveys On & Offshore, during (dry)docking or in operation offshore.
- Kiwa Oesterbaai performs surveys & training programs at sea to minimize your down-time.
- We are expanding our pool of surveyors globally to ensure a local presence and fast response times, minimizing travel and administrative costs whilst lowering the CO² foot print.
- Asbestos is still used in more than 100 countries! Therefore, getting asbestos (contaminations) on board of your vessel is not fiction.
- Asbestos inventories are mandatory. By not being able to show the required documents you risk serious delays while docking or during decommissioning.
- We can provide an Asbestos Safe Certificate for your vessel or platform.
- The IHM regularization will be imposed for all EU flagged ships and ships harbouring in EU ports as from December 2018!
- You can prevent unnecessary costs when you are in compliance with your asbestos inventory.
- We have already surveyed more than 2500 vessels. Why not become one of them?

Incident Response

Fire, explosions, storm and water damage can release asbestos fibres into the open. It is then essential to act quickly and effectively to ensure the safety of bystanders and to prevent the further distribution of asbestos. Our Kiwa Oesterbaai emergency team has fully equipped emergency vessels and is available 24 hours a day.

Asbestos Emergency Line: +31 (0)10 - 208 8444

We will take immediate action as soon as you call:

- By determining the nature and extent of the asbestos released
- By cordoning off the infected area
- By using air samples
- By providing a plan of action and organizing remediation by a certified asbestos remediator

The Kiwa Oesterbaai emergency team is available 24 hours to give on-site advice to emergency response employees, environmental agencies and municipalities. After this initial assistance, we immediately proceed with monitoring the emergency area, ensuring a safe development in potentially hazardous situations.

E-course and Training

Improving knowledge, risk awareness and risk perception is an essential element of our Risk & Compliance Management service package. By acquiring knowledge about Risks and combined health related issues we can prevent unnecessary exposures.

Kiwa Oesterbaai Maritime & Offshore offers the following training programs for your staff & crew:

- Asbestos Awareness E-learning
- Asbestos Awareness course
- Asbestos Removal (for crews during operations)
- HazMat expert (Certified training course)
- Tailor-made Toolboxes (aligned to your HSE policies)

The aim of our courses and training is to be flexible and effective (interactive and taught in small groups).
